Job Role: Full Stack Web Development

Profile Summary

MERN Stack Developer

Skilled MERN Stack Developer with experience in building dynamic web applications using MongoDB, Express.js, React, and Node.js. Proficient in creating RESTful APIs, managing state with Redux, and implementing JWT-based authentication. Strong focus on responsive design, clean code, and scalable architecture.

Projects

EXPENSE MANAGEMENT SYSTEM   Oct 2024 / solo project

- Created a web application that allows authenticated users to log in and manage their expenses and budgets.
- Implemented CRUD operations (Create, Read, Update, Delete) for expenses and budgets, enabling users to add, delete, and modify their financial data efficiently.
- Integrated data visualization features to display expenses over time, helping users analyze their spending habits.
- Ensured user authentication and security to protect sensitive financial information

EMPLOYEE MANAGEMENT SYSTEM   Sept 2024 / solo project

- Created a web application that allows authenticated users to log in and manage employee details securely.
- Implemented CRUD operations (Create, Read, Update, Delete) for employee records, enabling efficient management of employee information..
- Ensured robust user authentication and security measures to protect sensitive data.
- Enabled search functionality, allowing users to find employees based on various criteria such as name, job title, or department.

forex-rate-scraping-api   oct 2024 / solo project

- Developed a Forex Rate Scraping API that automates the extraction of forex conversion rates from a designated website. The system scrapes daily conversion data and stores it in a database to maintain a historical record of currency pairs.
- The API provides endpoints to retrieve the average and closing conversion rates for selected currency pairs over specified time periods.
- Ensured efficient data handling and accurate rate calculations to support comprehensive historical analysis of forex trends.
